Title: METHOD FOR GENERATING AND NAVIGATING A PLURALITY OF  
MENUS USING A DATABASE AND A MENU TEMPLATE  
ELECTION IN RESPONSE TO RESTRICTION REQUIREMENT

Bellevue, Washington 98004  
January 7, 2005

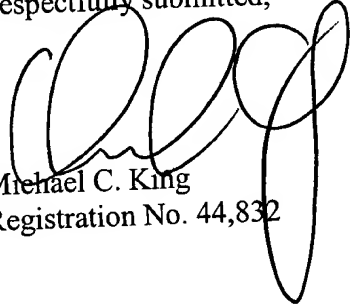

TO THE DIRECTOR OF THE PATENT AND TRADEMARK OFFICE:

The following is in response to an Office Action mailed December 9, 2004, in which the Examiner restricted the above-identified patent application. The Examiner has indicated that this application contains claims directed to four patentably distinct inventions. He identified a first invention (directed to the use of a computer display menu for selecting a menu item, where the menu has a one-to-one correspondence to switches of an input device) as defined by Claims 1-29; a second invention (directed to generating a computer display menu, where the menu is generated from a menu database, a menu template, and a menu template modifier) as defined by Claims 30-37; a third invention (directed to reducing database memory storage requirements for computer menu display information) as defined by Claims 38 and 39; and a fourth invention (directed to utilizing a plurality of menus, where a user selects a desired menu, causing a menu to be generated using a menu database, a menu template and a menu modifier, allowing a user to select a menu item from the generated menu, and causing an event to occur related to the menu item selected) as defined by Claims 40-56.

///  
///  
///  
///  
///

1 In response to this Restriction, applicants hereby affirmatively elect Claims 40-56, subject to  
2 applicant's right to file one or more divisional applications directed to any non-elected claims in  
3 the pending application.

4 Respectfully submitted,

5
